

## Jad Eid MD,

Clinical Assistant Professor of Obstetrics, Gynecology, and Reproductive Medicine

[jad.eid@laumcrh.com](mailto:jad.eid@laumcrh.com)

Dr. Jad Eid is a French board–certified Obstetrician and Gynecologist specializing in Reproductive Medicine, with extensive expertise in women’s health, fertility care, and gynecological treatments.

Dr. Eid earned his Medical Doctorate from the Lebanese American University in 2016, followed by a specialization in Obstetrics and Gynecology at the same institution. He then completed a fellowship in Reproductive Medicine at Paris Saclay University, France, focusing on assisted reproductive technologies, infertility management, and fertility preservation.

Dr. Eid practiced for over six years in Paris, where he provided comprehensive care in obstetrics, general gynecology, and reproductive medicine.

His clinical expertise encompasses IVF, ICSI, egg freezing, fertility preservation, high-risk pregnancy management, and functional, aesthetic, and regenerative gynecology. He also has a particular focus on vaginal health, sexual wellness, and women’s longevity, combining technical excellence with a holistic, patient-centered approach.

Dr. Eid’s international experience includes sub-internships and exchange programs in gynecology oncology, reproductive endocrinology, infertility, and high-risk pregnancies at institutions in the United States and France, such as Cornell Medicine, George Washington University, and Washington University in St. Louis. He also served as a Clinical Assistant Professor at Gonesse University Hospital Center and Jean-Verdier Hospital - APHP, while maintaining affiliations with La Clinique des Femmes, Gyn&Co, One Clinic, and Maison de la Fertilité.

Dr. Eid is a strong advocate for patient education and long-term wellbeing, emphasizing prevention, early diagnosis, and personalized care in his practice. He has contributed to multiple publications and research projects in reproductive medicine, including studies on luteal phase monitoring, premature ovarian insufficiency, and embryo selection strategies. His work has been presented at international conferences, reflecting his commitment to advancing knowledge in infertility and reproductive health.

Through his clinical practice, teaching, and research, Dr. Eid strives to empower women to take confident control of their reproductive and overall health. His integrated approach ensures that women receive care tailored to their unique needs throughout all stages of life, from adolescence to motherhood and beyond.
